“If you were born before 1990, you are considered to be a digital immigrant...’
-Marc Prensky

Cyber-safety Year 7 Parent Information Session

Mater Dei shares responsibility with parents to ensure students are educated about cyber-safety and protected from the impact of inappropriate material.

As such, we have invited Jordan Foster from ySafe Solutions to address parents during the Year 7 Parent Information Evening about this very prevalent issue.

“The biggest issue in technology at the moment is that parents are always behind the 8-ball. Our children are digital natives; they can navigate technology like true pioneers. Parents, on the other hand, need education and support to be able to keep up with the ever-changing ways of technology and social media.”

Jordan is a registered Psychologist and a Gen Y; although on the older part of this spectrum, a digital native nonetheless. Jordan will address issues of cyber-bullying, online grooming, privacy management, online rights and responsibilities and laws around internet use.

Please note: Due to the important nature of the presentation, it is expected that at least one parent or guardian from each family attends. The presentation is strictly for adults and children are not permitted to attend due to the content of material presented.

Date: Monday 10 August

Time: 6.30pm

Location: Bernie Boss Hall, Mater Dei College
